

Portfolio Delivery

Analyse and treat risks from the top-down

A single source of truth

Leverage aggregated, risk-centric Portfolio analytics and Gantt charts

Enjoy confidence in a single, transparent and interactive source of truth

Experience minimal time-to-value and high return on investment

This Module analyses and treats risk from the top-down, and provides executives with a single, transparent and interactive source of truth for Portfolio Delivery that they can have complete confidence in.

Suitable for all portfolio and program delivery, this Module provides executives with one source of truth across single and multi-year Portfolio or Program Deliveries.

The incorporated Document Management and audit capabilities provide an additional layer of robust governance across the organisations strategic and operational plans.

The Portfolio Delivery Module's intuitive user interface and out-of-the-box features facilitate quick uptake and easy collaboration with minimal training, ensuring customers can derive value from the solution immediately.

The pre-configured risk profiles and algorithm frame works provide intelligent risk management, views and analytics. These features are beneficial for Executives and Portfolio, Program and Project Managers to streamline and create efficiencies through best practice workflows and templates for content and reports.

"What SurePact has permitted us to do is focus on that well structured, end-to-end portfolio and project management framework, with a transparency and visibility that lets everyone be on the same page and serve as the single point of truth."
